NEUREONIX

ARIZEN POLYMERS

WEBSITE DESIGN & DEVELOPMENT PROPOSAL

BUILDING A STRONGER DIGITAL IDENTITY.

A Strategic Website Development Proposal for Arizen Polymers India Private Limited.

PREPARED BY	PROPOSAL NO.	DATE	VALID UNTIL
Neureonix	NP/2026-27/001	02 November 2026	17 November 2026

02 — INTRODUCTION

A Digital Foundation for the Next Stage of Growth.

For industrial buyers, a supplier's website is often the first conversation. This proposal sets out how Neureonix will design and build a corporate website for Arizen Polymers India Private Limited — one credible destination that presents the company, its polymer portfolio and its capabilities, and turns visitor interest into qualified enquiries.

The website will be built on a content management system, so the Arizen team can keep products, images and pages current without depending on a developer for every change.

WHAT THE WEBSITE WILL ACHIEVE

01
Corporate digital presence
Establish a strong, professional presence that reflects the company accurately.

02
Product showcase
Present the polymer portfolio in a clear, structured and searchable way.

03
Buyer confidence
Build confidence with industrial buyers through clarity, consistency and detail.

04
Qualified B2B enquiries
Turn interest into qualified enquiries through focused calls to action.

05
Capabilities on display
Present infrastructure and quality capabilities with supporting imagery.

06
Self-managed content
Manage products and content through a secure administrative dashboard.

03 — PROJECT UNDERSTANDING

A polymer business that needs a website as precise as its materials.

COMPANY	Arizen Polymers India Private Limited
INDUSTRY	Polymer Manufacturing / Distribution
TARGET AUDIENCE	B2B clients · Industrial buyers · Manufacturers · Suppliers
CORE REQUIREMENTS	Corporate website with six public sections; Four product lines with dedicated presentation; Inquiry capture and management; CMS admin dashboard for ongoing updates

04 — PRODUCT SHOWCASE

The Portfolio, Presented with Precision.

Each product line will have its own structured presence on the website. The descriptions below are general material characteristics for presentation; final product content, grades and specifications will be supplied by Arizen.

P — 01

HIPS

High Impact Polystyrene

A rubber-modified polystyrene valued for its toughness and ease of processing, commonly used for packaging, appliance components and display applications.

P — 02

ABS

Acrylonitrile Butadiene Styrene

An engineering thermoplastic known for its balance of rigidity, toughness and surface finish, widely used for housings, automotive parts and consumer products.

P — 03

HDPE

High-Density Polyethylene

A high-density polyethylene recognised for its strength and chemical resistance, commonly processed into pipes, containers and moulded industrial products.

P — 04

PS

Polystyrene Granules

General-purpose polystyrene in granule form, appreciated for its clarity, rigidity and ease of moulding across packaging, household and disposable products.

Each product page on the website will include
Product overview · Technical specifications (supplied by Arizen) · Product image gallery · Direct product inquiry

Imagery shown is an illustrative material render, to be replaced with Arizen product photography.

05 — WEBSITE SCOPE OF WORK

Seven areas. One coherent platform.

Six public sections and one private dashboard, designed as a single coherent platform.

01 Home Page

The first impression: who Arizen is, what it offers and how to get in touch.

- Corporate hero section
- Company introduction
- Product highlights
- Business strengths
- Infrastructure overview
- Inquiry CTA

02 About Us

The people, purpose and direction behind the company.

- Company profile
- Vision and mission
- Team introduction
- Director's Message

03 Product Catalog

A structured catalogue that helps buyers find the right material quickly.

- Product categories
- Product details
- Technical specifications supplied by client
- Product images
- Inquiry functionality

04 Infrastructure

A visual overview of facilities and operational capability.

- Facilities overview
- Operational capabilities
- Infrastructure images

05 Quality Control

How quality is assured, presented with verified client-supplied detail.

- Quality assurance processes
- Testing procedures
- Verified certifications and standards supplied by the client

06 Contact Us

Every route for a buyer to reach the team.

- Contact details
- Inquiry form
- Google Maps integration
- Phone and email options

07 CMS Admin Dashboard

A private, secure dashboard to manage the website without a developer.

- Secure authentication
- Dashboard overview
- Product management
- Category management
- Website content management
- Image management
- Inquiry management
- SEO metadata management

06 — TECHNICAL FEATURES

Engineered for Performance, Security & Search.

01
Fully responsive design
Layouts crafted for desktop, tablet and mobile.

02
CMS-based content management
Update products and pages from the dashboard.

03
Secure admin authentication
Protected sign-in for authorised administrators.

04
SEO-friendly architecture
Clean URLs and semantic, crawlable structure.

05
Search engine sitemap
XML sitemap to help search engines index pages.

06
Robots.txt
Crawler rules configured for the live site.

07
Meta title & description management
Editable search metadata for each page.

08
SSL configuration
HTTPS encryption across the entire website.

09
Performance optimisation
Optimised assets for fast loading.

10
Secure inquiry forms
Validated forms with protection against spam.

11
Backup strategy
A defined approach to protecting site data.

12
Production deployment
Configured and launched on the live server.

07 — INFRASTRUCTURE & EXPERIENCE

The Digital Foundation

How the proposed website will be put together, layer by layer. Everything described here is part of the planned build and will be delivered during the project.

01	Frontend experience	A fast, responsive interface designed mobile-first, with clear typography and navigation tuned for industrial buyers on every screen size.
02	Product information architecture	Categories, products and specifications organised so a buyer can reach the right material, and send an inquiry about it, in a few steps.
03	Inquiry processing	Validated, spam-protected inquiry forms whose submissions are stored in the dashboard for the team to review and follow up.
04	Backend architecture	A secure application layer and database that serve products, categories, pages and inquiries to the website in a structured way.
05	CMS management	A private admin dashboard where authorised staff manage products, categories, images, page content, inquiries and SEO metadata.
06	SEO & performance	Managed meta titles and descriptions, an XML sitemap, robots.txt and optimised assets, so the website is fast and discoverable.
07	Security & deployment	SSL, secure authentication, a backup strategy and production deployment on domain and hosting registered under Arizen's ownership.

08 — COMMERCIAL PROPOSAL

AN INVESTMENT IN YOUR DIGITAL FUTURE.

₹85,000

Total Website Design & Development Investment

GST: Additional as applicable.

COST BREAKDOWN

#	DESCRIPTION	AMOUNT
01	UI/UX Design & Corporate Website Layout	₹15,000
02	Frontend Website Development	₹20,000
03	Backend Development & CMS Admin Dashboard	₹22,000
04	Product Catalog & Inquiry Management	₹12,000
05	Testing, Optimization & SEO Setup	₹8,000
06	Deployment, SSL & Production Configuration	₹8,000
	Total	**₹85,000**

GST: Additional as applicable.

10 — PAYMENT MILESTONES

A CLEAR & TRANSPARENT ENGAGEMENT.

MILESTONE 01

40%

₹34,000

Project Confirmation & Initiation

MILESTONE 02

30%

₹25,500

Design Approval & Development Progress

MILESTONE 03

20%

₹17,000

Final Testing & Client Approval

MILESTONE 04

10%

₹8,500

Production Deployment & Handover

Total ₹85,000

GST: Additional as applicable.

09 — PROJECT TIMELINE

FROM CONCEPT TO LAUNCH.

Estimated duration: 25–33 working days

STAGE	ACTIVITY	DURATION	DETAIL
01	Requirement Analysis & UI/UX Design	5–7 Days	Confirm requirements and site structure, then design the key page layouts for review. Two rounds of design revisions are included.
02	Frontend Development	7–8 Days	Build the approved designs as a fully responsive website across desktop, tablet and mobile.
03	Backend & CMS Development	7–8 Days	Develop the database, secure authentication and CMS admin dashboard for products, content, images, inquiries and SEO.
04	Integration, Testing & SEO	5–6 Days	Connect the frontend to the CMS, test forms and devices, optimise performance and configure SEO essentials.
05	Client Review & Deployment	3–4 Days	Final review with the Arizen team, then SSL-enabled production deployment and handover.

11 — ANNUAL RECURRING COSTS

Running costs, clearly estimated.

Estimated yearly running costs after launch. These are separate from the project investment.

SERVICE	ESTIMATED ANNUAL COST
Domain Registration	₹1,000–₹1,500
Website Hosting / Cloud Server	₹8,000–₹12,000
SSL Certificate	Free (Let's Encrypt)
Optional Technical Maintenance	₹18,000
Estimated annual total with optional maintenance	**₹27,000–₹31,500**

Domain, hosting and other third-party prices are indicative estimates. Actual third-party prices may vary.

OPTIONAL

Optional Technical Maintenance

₹18,000 per year

- ✓ Website availability monitoring
- ✓ Basic technical troubleshooting
- ✓ Security and dependency updates
- ✓ Minor content updates
- ✓ Backup monitoring

12 — PROJECT DELIVERABLES

What You Receive.

01	Fully functional corporate website	02	Responsive design
03	CMS admin dashboard	04	Product and category management
05	Inquiry management	06	Basic SEO configuration
07	SSL-enabled production deployment	08	Source code handover
09	Admin credentials	10	Admin usage guidance
11	30 days of post-launch bug-fix support		

13 — TERMS & CONDITIONS

The fine print, made plain.

01	Client provides company logo, brand assets, product images, and content.
02	Two rounds of design revisions are included.
03	Additional functionality outside agreed scope is charged separately.
04	Premium licenses and third-party API charges are excluded unless specified.
05	Timelines depend on timely client feedback and content submission.
06	Domain and hosting should be registered under client ownership.
07	Quotation validity: 15 days (valid until 17 November 2026).
08	Final source-code handover after full payment.
09	Maintenance is optional and separate.

14 — PORTFOLIO

Portfolio References Available Upon Request.

Relevant project references, live links and case material can be shared on request, ahead of or alongside a discussion of this proposal.

15 — CONTACT & ACCEPTANCE

LET'S BUILD SOMETHING EXCEPTIONAL TOGETHER.

We look forward to partnering with Arizen Polymers India Private Limited to create a strong, professional, and future-ready digital presence.
